Temperley, Buenos Aires, Argentina

Date of birth: 12-20-2003

I am a responsible and committed person, looking to gain work experience in a position where I can learn, improve and achieve my work objectives in a pleasant and comfortable environment.

EXPERIENCE

Due to the fact that I'm currently studying a Bachelor's Degree in Computer Engineering I have not had the opportunity to gain work experience, however, I've had certain personal and academic projects, some important of these are:

Product Showcase Website - Festicool

September 2023 - December 2024

Website developed in React, contains a catalog with all the products loaded through rest api, contains a search that filters the products by the name or series, and the website contains information about the company. Link : [here](#)

OrderMe.app

November 2023 - January 2024

Sample page for Orderme app, a restaurant-oriented company's software where they sell their services. I sold and developed it in 3 months, also developed in React. Link : [here](#)

E-commerce - BarkMobb

January 2024 - March 2024

React-based e-commerce clothing store, products loaded with Firebase database, access to an admin control with CRUD functions, and includes a product viewer. Link : [here](#)

STUDIES

Colegio Normal Superior N° 3 - Bernardino Rivadavia, Highschool

2017-2021

Universidad Nacional de Lanús, Bachelor's Degree in Computer Engineering

2022-Present
